DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States
- 2. Claims 1, 3-4 and 7 are finally rejected under 35 U.S.C. 102(b) as being anticipated by Goldfarb.

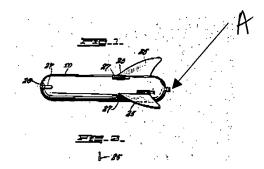

Goldfarb discloses in Figs 1-4, an inflatable toy apparatus, comprising: an inflatable elongated body 10 having a length, an elongated gripping piece [nozzle 13 which is inherently capable of being gripped] that is provided along a portion of the length, a nose piece [cork 28] made from a material that is different from that of the elongated body and a plurality of curved tails [fins 16-17 and 19-20] as recited in claims 1 and 4. Additionally, Goldfarb discloses the tails are made from a material that is the same as that of the elongated body [col 2 lines 4-6] as recited in claim 3.

3. Claims 1-2, 4, 6 and 28 are finally rejected under 35 U.S.C. 102(b) as being anticipated by Lemelson [2,763,958], hereinafter Lemelson.

Lemelson discloses in Figs 1-2 (also see Figure below wherein the letter A has been added by the examiner), an inflatable toy apparatus, comprising: an inflatable elongated body 10 having a length, an elongated gripping piece [tab 26 which is inherently capable of being gripped] is provided along a portion of the length of the elongated body, a nose piece [weight 28] made from a material that is different from that

Art Unit: 3712

of the elongated body, a plurality of curved tails [fins 25] as recited in claims 1 and 4. Also, Lemelson discloses the tails are made from a material that is different from that of the elongated body as recited in claim 2, a tailpiece [pressure-sensitive tape 27] as recited in claim 6 and an nozzle A as recited in claim 28.

Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claims 1-2, 4 and 6 are finally rejected under 35 U.S.C. 103(a) as being unpatentable over Lemelson in view of Goldfarb. Lemelson is interpreted differently herein than as set forth in paragraph 2.

Lemelson discloses in Figs 1-2 (also see Figure above wherein the letter A has been added by the examiner), an inflatable toy apparatus, comprising: an inflatable elongated body 10 having a length, an elongated gripping piece A [A is inherently capable of being gripped], a nose piece [weight 28] and a plurality of curved tails [fins

Art Unit: 3712

25] as recited in claims 1 and 4. Additionally, Lemelson discloses a tailpiece [pressure-sensitive tape 27] as recited in claim 6.

Lemelson does not disclose that the A [elongated gripping piece] is provided along a portion of the length of the elongated body.

Goldfarb teaches the concept of providing an inflatable aerial toy with a central orifice 14 [gripping piece through which a tube may be inserted for inflating the inflatable aerial toy] along a portion of the length of it's elongated body. It would have been obvious to one of ordinary skill in the art at the time the invention was made to provided device of Lemelson with the central orifice [gripping piece] along the portion of the length of the elongated body as taught by Goldfarb for easy access while inflating the device and for aesthetic reasons.

Allowable Subject Matter

6. Claim 5 is allowed.

Response to Arguments

7. Applicant's arguments filed 8/12/04 have been fully considered but they are not persuasive.

In response to applicant's argument in page 4, the device of Goldfarb and Lemelson both clearly disclose an elongated gripping piece, which inherently is capable of being gripped by a user.

In response to applicant's argument that the Examiner ignores the normal meaning of the word "gripping", which means the piece must be capable of being gripped by a user and that to grip something, a user must be able to place more than

Art Unit: 3712

one finger onto the piece, otherwise it would not be possible establish a "grip". The examiner disagrees with applicant's assertion. In order to grip something, a user does not have to place more than one finger onto the piece, a user may use his or her fingers or arms or teeth or even toes to grip something.

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Faye Francis whose telephone number is 703-306-5941. The examiner can normally be reached on M-F 6:30-3:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Derris Banks can be reached on 703-308-1745. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
